The Board of Oil, Gas and Mining concluded hearings into the contested coal permit for Alton Coal Development's Coal Hollow Mine on Friday, June 11th. Attorneys for the environmental groups contesting the permit, as well as the division, were to file final briefs stating their positions on Friday, June 18th. A decision from the board is expected within 30 to 90 days.

Oil and Gas

Richard Powell sent the two photos below saying, "Here are some produced water disposal pics (sic). These are the head-works where oil water separation is taking place." Richard noted that he hasn't seen any waster disposal pictures on our website but says, "It is a huge part of what we deal with in the field."

AMR

Jill Marriott and Paula Dupin-Zahn joined with Legislative Fiscal Analyst Ivan Djambov in accompanying Chris Rohrer and Steve Fluke in a pre-bid tour for AMR's North Tintic Project last week. Contractors who wish to bid on a project are given a guided tour of the site and detailed description of the work to be performed to aid them in coming up with their bids. This was also an opportunity to educate Ivan about abandoned mine projects and the needs of our program.

And a final thought for your Thursday. The 50-50-90 rule: Anytime you have a 50-50 chance of getting something right, there's a 90% chance you'll get it wrong. Have a good one!
